MVC320 Focus and Small Meeting Room

Microsoft Teams Rooms System for Focus and Small Room

Yealink MVC series are native and easy-to-use video conferencing solutions specially designed for Microsoft Teams rooms. The MVC series provides a full-scene video conference solution to cover all meeting rooms from small to large. According to the unique characteristics of the video conferencing room, a high-performance mini-PC is specially released. The mini-PC design takes into account aesthetics and practicability, fully integrating the cable management with itself to provide a flexible and reliable deployment solution for any meeting room. The MVC series features the native Microsoft Teams-tailored user interface that is easy to operate with a close-to-zero learning curve. You just walk into the meeting room and start your scheduled Teams or Skype for Business meeting with a one-touch join. The Yealink MVC320 includes an UVC30-Room ultra HD 4K camera and an MSpeech smart USB speakerphone to meet the requirements of focus and small meeting rooms.

One Cable Technology | 4K UHD Resolution | Auto Framing | Wireless Content Sharing | 3-Microphone Array | Device Management

Key Features and Benefits

Native Microsoft Teams-tailored user interface, smooth conference experience
Native Microsoft Teams-tailored user interface offers a one-touch meeting join. Designed with the idea of multi-function all-in-one, the MTouch II touch panel allows you efficiently perform call control, camera control, content sharing and other functions. At the same time, MTouch has a built-in Human Motion Sensor that the conference system can automatically wake up and you can immediately start the conference.

Auto-framing & smart audio

Yealink UVC30-Room camera allows for framing all participants present at a meeting, freeing your hands and focusing on the meeting itself. Meanwhile, with the Yealink camera control plug-in and camera presets, the electronic pan, tilt and zoom can be easily done in one step. Empowered with a 120° extra-large field of view, UVC30 supports 4K/30FPS ultra HD video calls that conduct business to capture everyone in the meeting room. As for the audio, the MSpeech speakerphone can provide the voice recognition feature of the Teams Rooms application, including voice transcription, real-time translation, and Cortana voice assistant, bringing users an intelligent and efficient video conferencing experience.

Content sharing in real time

The unique wireless content sharing solution provides participants maximum flexibility and a one-click content sharing can be simply realized by plugging into the WPP20. With a high resolution of 1080P/30 frames, it provides users with a better content sharing experience. Besides, wired content sharing is also available by connecting to the USB-C or HDMI port.

Simple to deploy, easy to use

With the VCH port, MCore is specially designed for video meeting rooms so that the deployment can be easily extended. At the same time, its all-in-one design with the cable management feature ensures the wire connection's stability and the most appropriate deployment can be achieved according to the layout of the meeting room. One CAT5e is enough to connect the TV area and the conference table area, and to complete the data transmission and power supply, no additional power supply or extension cable is needed, which not only simplifies the deployment but also effectively reduces deployment costs.
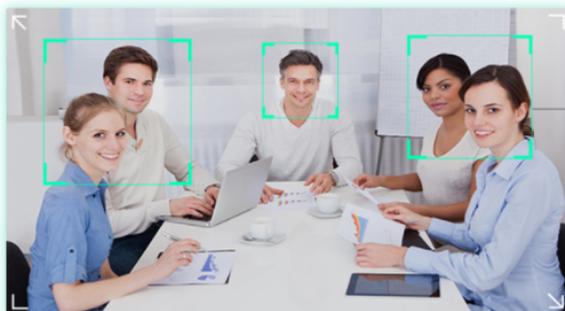

Manage your devices remotely

This solution supports Yealink Device Management Platform/Cloud Service, and you can flawlessly manage, monitor, configure, update and diagnose all Yealink audio and video device peripherals on this platform remotely.

Provide a wide view of the meeting room

MVC320 can cover between 2 to 7 people. Even in small spaces, the meeting screen in the MVC320 room system features a wide field of view perfectly. Auto-framing and a 120° wide-angle lens enable the UVC30 to recognize and frame all meeting participants in the most appropriate view. With the 4K/30FPS resolution, all participants can enjoy a vivid Teams meeting experience.
